1. TECHNATION INTRODUCTION

TECHNATION OVERVIEW (formerly ITAC: Information Technology Association of Canada)

At TECHNATION, we unite Canada's technology sector, governments, and communities for Canada's future. For more than 60 years, we've championed Canada's technological future by helping to facilitate and enable the tech industry and government to work together to grow and evolve with new technology available.

TECHNATION Health Trade Mission

As part of our commitment to encourage the development of international business development strategies, and to explore new markets for Health ICT companies, TECHNATION Health is pleased to support the TECHNATION Health Trade Mission to the [HIMSS Europe 2023 Conference](#) in Lisbon, Portugal from June 7-9, 2023.

This three-day Health IT conference is a unique opportunity to bring together two worlds that need to work hand in hand to accelerate the development of digital health across Europe. Participants will have the opportunity to interact with over 2,000 key implementation stakeholders such as health authorities, hospital C-Suite decision makers to clinicians, nurses, payers, life science, innovators, as well as health entrepreneurs and start-ups.

We have also curated additional business opportunities for the participants. A virtual pre-mission meeting with the Senior Trade Commissioner, Djordje Vidović and Trade Commissioner, Ana Costa Afonso, who will provide a brief overview of doing business in Portugal, trade relationship between our two countries and other insights.

The project coordinator for the XpanDH project, Dr. Henrique Martins, will meet with our delegates to provide valuable information around the project which builds capacity in individuals and organizations with the aim of creating, adapting and exploring the use of interoperable digital health solutions through a shared adoption of the [EEHRxF](#) (The European Electronic Health Record Exchange Format) across the EU. EEHRxF is the commission recommendation that sets out a framework for the development of a European electronic health record exchange format in order to achieve secure, interoperable, cross-border access to, and exchange of, electronic health data in the European Union.

To compliment the information that Dr. Martins and his team will provide to us on XpanDH, the EU context and the Portuguese Digital Health landscape and perspectives, he has arranged for leaders from Greece, the Netherlands and Africa to provide us with their DH landscape and perspectives to join us virtually during the meeting.

Additionally, HIMSS Europe has arranged for our delegates to meet with the leadership of the Health Cluster Portugal, a leading actor in Portugal and a HIMSS Europe strategic partner of the Conference. A meeting has been arranged with Joana Feijó, Business Development Director and Patrícia Patrício, Knowledge and Intel Manager of Health Cluster Portugal. Health Cluster Portugal assumes the mission of contributing to a greater competitiveness of the national Health value chain by valuing the knowledge generated and available at universities, research institutes, hospitals and companies within a framework of economic and social development, sustainability, and of more and better health for all.

TECHNATION Health

As the Health division of TECHNATION (formerly known as the Information Technology Association of Canada), our mandates and objectives are membership driven, providing a consolidated, single voice for the membership to help influence the Canadian healthcare ICT market. By providing access to information on the market trends and issues that need to be addressed, members develop a sense of direction of where the industry is going, and have the opportunity to influence that direction, in order to better focus their overall product and service strategies and develop the network necessary to effectively execute on those strategies.

Angela Mondou
President and CEO, TECHNATION

Angela joined TECHNATION in 2019 with over 25+ years of exceptional global and Canadian experience in the Technology sector, driving transformational programs in global supply chain, technology product introduction and technology business integration. A visionary executive with a passion for leadership, Angela's unique career path includes 10 years as a military officer specializing in global supply chain and logistics followed by 18 years in senior-level leadership roles in the Technology and Defence sectors. Her diverse leadership experience includes Senior

Business Integration and Sales & Marketing Director with BlackBerry, and as Global Program Director, Mergers & Acquisitions with Nortel Networks, where her team was responsible for delivering technology to over 127 countries.

Elaine Huesing
Executive Director, Health

As the lead for Health (formerly ITAC Health), Elaine helps members navigate the ICT challenges and opportunities of the health sector both nationally and globally. Having been a part of the founding team for CHITTA, now known as TECHNATION's Health Division, the Alberta Network for Health Information exchange (ANHIX) and the Canadian Health Informatics Awards (CHIA) Gala which celebrate the innovations in the Canadian healthcare sector, she brings over 30 years of experience to the health

Members. Elaine is the Editor and Publisher of HIM&CC, the official journal of TECHNATION'S Health programming and Digital Health Canada and the CEO for IMIA, The International Medical Informatics Association.

2. OVERVIEW

TECHNATION Canada (formerly ITAC) wishes to acknowledge, with great appreciation, CanExport's invaluable support of our recent SME Trade Mission to Lisbon, Portugal. As this Report indicates, delegate feedback underscores both the usefulness of the trip as well as the extent of the need for future such initiatives in support of SME businesses in Canada.

As Canada's national ICT business association, TECHNATION Canada champions the development of a robust and sustainable digital economy in Canada, inclusive of all. A vital connection between business and government, TECHNATION provides its members with the advocacy, networking and professional development services that help them to thrive nationally and compete globally.

A prominent advocate for the expansion of Canada's innovative capacity, TECHNATION encourages technology adoption to capitalize on productivity and performance opportunities across all sectors. A member-driven not-for-profit, TECHNATION has served as the authoritative national voice of the \$170 billion ICT industry for over 60 years. More than 36,000 Canadian ICT firms create and supply goods and services that contribute to a more productive, competitive, and innovative society. The ICT sector generates over one million jobs directly and indirectly and invests \$4.9 billion annually in R&D – more than any other private sector performer.

TECHNATION has conducted previous trade missions to the UAE and India encouraging over 30 ICT companies to explore opportunities in these markets. TECHNATION has also led trades missions in the past under the former ITAC name. Below are our most recent missions that were found to be highly successful.

- TECHNATION's RSA Conference 2022, San Francisco, California, **June 6-9, 2022**
- TECHNATION'S SME to Web Summit, Lisbon, Portugal, **November 1-4, 2022**
- ITAC Women-Led TECH Trade Mission to Web Summit, Lisbon Portugal, **November 7-9, 2019**
- ITAC Health TECH Trade Mission to Helsinki, Finland, **June 11-13, 2019**

TECHNATION also specifically supports female entrepreneurs as they grow their businesses and helps them gain access to market, capital and talent. Many of these emerging companies are now viable and competitive and are looking to scale and grow their businesses internationally.

We were proud to partner with Women in Tech Portugal to host a networking event designed to showcase female founders from around the globe. Sylvie Ouellette, CEO and Founder of Versatil (and TECHNATION Ontario Board member) represented TECHNATION at this event as a shining example of Canadian entrepreneurship success. Versatil is a diversity unicorn for Canada and is one of the few companies to be diversity certified in every category.

In Lisbon, TECHNATION specifically supported Canadian SME scale-ups. Given TECHNATION's longstanding commitment to pushing Canada's status in technological innovation to grow our tech economy globally, Web Summit 2022 offered an excellent learning opportunity and environment to meet influential experts with the prospect of future collaborations. Our scale-ups are eager to expand and grow their businesses in European and global markets and came away from this mission with market intelligence, specific leads and access to international partners.

TECHNATION worked very closely with the Canada Embassy to Portugal and the Trade Commissioners on the ground in Portugal to curate specific b2b opportunities and networking events for our Canadian delegates. We were thrilled to join the over 240 Canadian delegates who also attended Web Summit.

Headed by Elaine Huesing, TECHNATION's Executive Director of Health, the delegation included the following seven (7) Canadian SME representatives.

In this document, TECHNATION has included the following proof of activity: key highlights from delegate reports on learnings, contacts and leads generated from the mission; various screenshots of tweets and photos capturing the event in progress; and a post-mission press release.

The Canadian companies who participated in this delegation were pan-Canadian and diverse. We were representative of many Canadian provinces, and we had a mix of female and BIPOC leaders participate. Mission delegates were asked to submit brief reports on their experiences. Below is a selection of key learnings. Participants echoed the critical importance and need for cybersecurity tech trade missions and the absolute importance of returning to in person trade mission opportunities post pandemic. SMEs/Scaleups have been profoundly affected by the pandemic and face increasing economic challenges. Opportunities such as this one, which is designed to help them compete in new markets/jurisdictions offer these companies tremendous scaffolding and support.

Throughout the trip, business founders informally shared the challenges they have faced to date in both trying to do business internationally and compete globally. While delegates were almost unanimously satisfied with the trade mission experience and greatly appreciated the opportunity to tap into the European market/connect with global companies. Delegates also strongly advocated for an increase for financial support from 50% to 75%. The cost to attend these trade missions/conferences is extremely expensive and they face a challenge in affordability/post pandemic inflation/increased costs of accommodation, international currency etc.

We look forward to future opportunities to support Canadian companies/SMEs and Scale-ups as they strive to thrive in global jurisdictions.

3. DELEGATE CONTACTS/LEADS AND TESTIMONIALS

CIVICA

Civica Solutions Canada is dedicated to growing its position as an industry leader in the development and delivery of software solutions for the healthcare industry in Canada. Having acquired Momentum Healthware in 2022, Civica aims to exploit its global footprint to create an international market for the products in the Momentum stable. Our solutions streamline healthcare delivery, enhance patient safety, and improve the overall care management of patients and residents across the continuum of care.

Civica is a global leader in public sector software with over 30 years of sector experience and a presence in UK, North America, Australia, New Zealand, and Singapore. The Civica suite of solutions improve care delivery for populations served by single healthcare providers, large chains, or state/provincial/national governments.

Tracey Cotterill
President

Tracey has worked for Civica for 2 years in our health and care division. She has spent most of her career in the NHS in the UK and has many years' experience as a CFO; a role which incorporates executive responsibility for IT and Digital. Establishing strong partnerships with our customers is a critical aspect for Tracey in her role at Civica. With her personal background working in health, she understands the challenges facing the sector and aims to ensure that the solutions provided help address those challenges.

Densitas® is a global leader in artificial intelligence solutions for breast cancer screening, focused on quality, safety, efficiency, and precision breast health. Densitas® intelliMammo™ supports hospitals and imaging centers delivering mammography services to improve efficiencies, meet FDA/ACR compliance requirements, and support early breast cancer detection and treatment. For more information, visit www.densitashealth.com.

Mo Abdoell
CEO and Founder

Mo Abdoell is the CEO and Founder of Densitas Inc., a company that is transforming the mammography enterprise through AI solutions for personalized breast health. The technologies developed by the company are specifically tailored to address breast density, clinical image quality, and risk assessment. In addition, Mo serves as an Associate Professor in Diagnostic Radiology at Dalhousie University.

With over 25 years of experience as a researcher, he has more than 100 publications to his name as both a co-author and primary author in medical literature. Mo brings a multifaceted perspective to Densitas Inc. with a background that includes a specialization in biostatistics from the Dalla Lana School of Public Health at the University of Toronto, and having served as an adjunct faculty member in Medical Informatics at Dalhousie University, Nova Scotia.

Dogwood Health Consulting is a Healthcare IT Consulting company. Dogwood's consulting team has decades of experience helping our clients navigate the complex and evolving digital healthcare landscape. From digital health strategy to healthcare IT interoperability, Dogwood consultants bring the extensive knowledge and expertise required to deliver innovative solutions to our clients. Our strengths are our Digital First Strategy, Change Management, Interoperability / FHIR, and Leadership/Volunteering/Mentorship. We collaborate with our clients to develop and implement digital health strategies that meet their current and emerging needs. We understand that one of the biggest obstacles to successful digital health transformation is the resistance to change. We've worked with dozens of clients to ensure ultimate success. The achievement of interoperability lies in a deep understanding of the underlying information standards that span geographical boundaries and technology solutions. Our interoperability experts are thought leaders in the international standards community. Our team is dedicated to giving back to the healthcare community. Dogwood Health Consultants are proud members of national and international professional associations and are thought leaders in digital health standards development organizations.

Jean Duteau
Chief Technology Officer

Jean is an experienced enterprise architect, systems analyst, and developer with 20+ years of experience in various disciplines and has been working with healthcare systems since 2000. He is a well-known Healthcare Standards evangelist. Jean has been a key participant in the implementation of HL7 standards and terminology specifications in numerous Canadian jurisdictions as well as in the United States, Australia, and the United Kingdom. Jean has worked in clinical and in research systems and has a keen understanding of implementation challenges and resolution strategies.

Fluid is a multifaceted team, built to solve complex health problems in a data-governed world. We are making primary care accessible to remote communities, workplaces and those without service anywhere and everywhere.

Chris Geisler
Founder and CEO

Chris is the Founder and CEO of Fluid Scientific Development and has been engaged with technology innovation and the health and safety of workers for over 30 years. Prior to Fluid Scientific, Chris was the Cofounder and President of Whitecap RSC Medical, where he supported remote communities, big industry operations and their workers travelling internationally during Covid-19. By creating dependable solutions through agile means, Chris balanced the needs of local health authorities and Canadian big industry to stay open through the pandemic. As the Founder and CEO of Fluid Scientific, Chris is making primary care accessible to those same communities and those underserved anywhere. Using a collaborative approach, Fluid's digital platform ensures everyone's health information is accessible and under their own control.

For the past 25 years, we have helped businesses create their market presence and achieve their goals. Our process is designed to empower your brand and outfit your business with the tools needed to succeed. Talk to us today about how we can support your growth, limit your turnover, and put you on a solid track to success and profit. Our services bring a comprehensive consult to identify gaps and realize opportunities with individualized plans unique to each client. As healthcare technology experts, we work with clients from various industries, who provide services for public sector and healthcare. Our experts work as executives embedded directly into our clients' leadership teams with diverse roles flexible to client need. Because **GLASS** lets light pass through, glass is symbolically associated to **clarity, access and the knowledge holding a promise, maybe a pledge, of total intelligibility where nothing will ever be concealed from our understanding.**

Glenn Lanteigne
Managing Director

Glenn Lanteigne brings 30 years of experience as a strategic advisor to more than 200 clients including providing leadership focused on business cases and governance strategy in all domains healthcare technology in Canada, the USA and Globally. Glenn is regarded as having one of the best networks within the healthcare industry, and has lived in Europe as well as Canada. Glenn has received several awards in the healthcare sector, recognized as one of the top healthcare leaders in North America. Prior to joining Tectonic, Glenn provided leadership to organizations including the Government of Ontario as a Regional CIO, leadership roles in the Government of Canada, CIO of LifeLabs, and leadership roles in industry including TELUS, Allscripts, CLINICARE and GE. Glenn has served 10 years in the Canadian Forces, holds a BA (Hons) in Economics & Politics from Royal Military College of Canada and an MBA from the University of Ottawa and is a GE Six Sigma Black Belt. He serves on the Board of Directors of various organizations including HIMSS Ontario, Technation Health, as well as serving two consecutive terms with Digital Health Canada and is an instructor at the National Institute for Health Informatics as well as leading various working groups for HIMSS and the Ontario Hospital Association.

Healthtech is the Canada-based unit of the Nordic Global Companies. Healthtech leverages and supplements the health and technology consulting experience of our partners around the globe, bringing expertise on operating within a universal healthcare environment. Healthtech's experience and certifications with a vast variety of systems has enabled it to deliver clinical, operational, and financial improvements to healthcare clients for over 40 years.

Terri Lafort
President, Nordic International

Terri LeFort is President, Nordic International, which includes Healthtech Consultants in Toronto, Ontario and Nordic Europe. Her educational background includes a Baccalaureate in Nursing and Masters in Business Administration. Terri's success in clinical healthcare technology consulting comes from her in-depth knowledge and experience in assisting organizations to use technologies to enable better and more efficient patient care. Terri has provided strategic leadership to organizations and jurisdictions across the country. Terri has spoken internationally and is known as an industry leader in advanced clinical system planning and implementation.

Tectonic is a Canadian advisory services firm that works with technology firms, investment firms, and the healthcare sector to accelerate adoption and innovation across the industry. We help technology firms successfully enter markets, prioritize market investments, and sustain long-term growth. We help firms find investment opportunities and perform due diligence on prospective investments. And, we work with the healthcare sector to strategically solve problems, assess solutions, and accelerate adoption of innovative solutions. With over 200 advisors with deep subject matter expertise and first-hand relationships across the sector, Tectonic brings unique custom built teams to each client engagement and ensures focused, pragmatic approaches to each client.

Robyn Fulkerson
Chief Operating Officer and Co-Founder

As a Partner at Tectonic, Robyn brings over 20 years international experience in market and program development with expertise in virtual health, telehealth direct to consumer and outsourcing for more than 150 clients in Canada, the US and Globally. Robyn is recognized as a top virtual healthcare leader with expertise in telehealth, virtual care, insurance, assistance services and outsourcing. Robyn has led large national stakeholder engagements on behalf of clients and has deep experience in developing large scale healthcare and consumer-oriented initiatives. Prior to joining Tectonic, Robyn provided market development internationally for business process outsourcing firms; supporting clients domestically and around the world, applied in areas of telehealth and remote/ rural and population health and customer support across multiple domains. Robyn holds a BA from Western University and MBA from Haskayne School of Management, Six Sigma and Lean designations.

Testimonials

“Connecting with the XpanDH team was very useful and I am keen to follow up with a number of the participants to see how Civica Canada can help them on their journey. I was particularly interested in talking over lunch with Wuleta Lemma on what is happening in Africa – see LinkedIn post on that. The conference itself was helpful to gain market insights on the latest developments and competitors we may be faced with as we look at European expansion. Also, attending the sessions always provides insights into how different organisations are overcoming the global challenges around the quintuple aim (although I did see one stand still referring to the quadruple aim – keep up).”

Tracey Cotterill
President, Civica Solutions Canada Inc

“This CanExport Sponsorship was an exceptional opportunity to join other Canadian Healthcare firms working together to explore export opportunities with the European community by attending the HIMSS23 Europe Conference in Lisbon Portugal. The value-added event that included a visit to the University of Lisbon offered an intimate and direct engagement with leaders in standards and interoperability allowing access to leaders from Africa, France, Portugal, Spain, Estonia, Norway, Slovakia, Singapore, Greece and the Netherlands. This has allowed us to better understand the XpanDH Project and perspectives on EEHRxF. I found tremendous value in this program and confident it will help with business opportunities that we are now following up on. I highly recommend this program and thank all of those involved and the direct support of Elaine Huesing who coordinated much of the visit.”

Glenn Lanteigne
Managing Director, GLASS

“I think it’s pivotal to deepen our perspective of other jurisdictions, and broaden our context. I had a lot of excellent discussions and much will come from those near and longer term, so it’s a huge win having gone I would say. Thank you for letting me a part of it!”

Chris Geisler
Founder and CEO, Fluid Scientific

“Dogwood Health Consulting found the opportunity provided by this TECHNATION Health 2023 HIMSS Europe Trade Mission to be very valuable. I was able to meet with my counterparts in other countries such as Portugal, Estonia, Slovakia, and Austria. I also heard from other countries and the opportunities that Dogwood Health might be able to take advantage of. We are very excited to pursue some of the leads that we gained from the meetings. The ability to attend HIMSS 2023 Europe and meet other companies and hear how Digital Health is progressing in Europe was also an advantage of this trade mission. We really found this to be quite useful and are very hopeful that we can do this next year.”

Jean Duteau
Chief Technology Officer, Dogwood Health Consulting

“I very much appreciated being including in this CanExport Sponsorship opportunity to join other Canadians on this trip to Lisbon to develop opportunities with the HIMSS Europe community. The value-added event that included a visit to the University of Lisbon offered an intimate and direct engagement with leaders in standards and interoperability allowing access to leaders from Africa, France, Portugal, Spain, Estonia, Norway, Slovakia, Singapore, Greece and the Netherlands. This has allowed us to better understand the XpanDH Project and perspectives on EHRxF. My company found tremendous value the event and has developed some key business opportunities that we would not have had otherwise.”

Robyn Fulkerson
Chief Operating Officer, Tectonic Advisory Services Inc
